
EUREKA MATH

Numbers should add up to more than a right answer. They should inspire aha moments and joyful connections. *Eureka Math*[®] set a new standard for rigor, coherence, and focus in the classroom so students gain a deeper understanding of the why behind the numbers, all while making math more enjoyable to learn and teach.

Eureka Math is completely aligned to [Idaho Core standards](#) and is rated as one of the strongest K-12 math curriculum available according to the [Evaluation Reports](#) on edreports.org.

Since the beginning of implementation of Eureka Math, Cascade Schools cohorts have improved from 28% Proficient to almost 67%!

The curriculum is rigorous and we are seeing great results at school but realize that helping your child can be difficult. We encourage you to explore the following resources and if you do not find them helpful, please contact your child's math teacher. Here are some tools that you can access to help your child:

- Contact your child's math teacher about the concepts, some great questions to ask are:
 - How does this concept fit into the overall structure of the curriculum?
 - How much exposure has my child had to this idea? Is it their first time, or should they be expected to know how to do it well at this time?
 - How important is this concept, should I worry if my child isn't getting it?
 - What is an appropriate amount of time to spend on a piece of math homework?
- Check out the Homework Helper that is in your child's workbook, the Homework Helper is designed to assist with the big ideas of the daily concept and should be sent home daily when there is homework.
- Jump on to [Kahn Academy](#) and search the grade level, module, and lesson # to find a video to help teach the concept (to either you or your child).
- Create an account with [Great Minds](#) to access the Parent Tip Sheets, or contact your child's teacher to get the most recent copy.
- [Zearn](#) has some great practice resources that kids can use to reinforce their understanding of the concepts.

THE MOST WIDELY USED MATH CURRICULUM IN THE U.S.

Cascade Schools has committed to the Eureka Math curriculum for grades K-12 until the adoption cycle for math comes open again in the year 2024. When it comes time to re-evaluate the curriculum we would welcome input from all stakeholders in order to make the best decision possible for our students and community.

The Idaho Department of Education is currently seeking feedback on Mathematics Standards. Learn more about the process.

“Students learn to think, strategize and solve problems... not just get answers.”

- JILL DINIZ, CHIEF ACADEMIC OFFICER, EUREKA MATH
